### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Curtis Herbert on 3/26/10.

The application has been amended as follows:

Cancel withdrawn claims 44-65.

Amend claims 42 as follows:

42. (Previously Presented) A medical device according to claim 41 wherein ~~the medical device is formed from or coated with the polymeric material of claim 39, or the medical device is first formed from or coated with polymeric material which is thereafter reacted with an infection resistant biguanide-containing moiety such that the biguanide-containing moiety is chemically bound to the polymer chain though some but not all of the secondary amine nitrogen atoms of a biguanide group, wherein said chemical binding is via a substituted urea linkage or a substituted thiourea linkage or a N,N-disubstituted amide linkage or a N,N-disubstituted hemiaminal or aminated linkage or a tertiary amine linkage.~~

Amend claims 67 as follows:

Art Unit: 1618

67. (Previously Presented) A medical device according to claim 41 wherein ~~the medical device is formed from or coated with the polymeric material of claim 39 or the~~ medical device is first formed from or coated with polymeric material which is thereafter reacted with an infection resistant biguanide-containing moiety comprising a plurality of biguanide groups such that the biguanide-containing moiety is chemically bound to the polymer chain though some but not all of the secondary amine nitrogen atoms of a biguanide group of the infection resistant biguanide-containing moiety, and the chemical binding is via a substituted urea linkage, or a substituted thiourea linkage, or a N,N-disubstituted amide linkage or a N,N-disubstituted hemiaminal or aminal linkage or a tertiary amine linkage.

#### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The claims are drawn to a polymeric material comprising a plurality of pendent biguanide groups chemically bound to the polymer chain via some but not all of the secondary amine nitrogen atoms of the biguanide group. The chemical bond is via a substituted urea linkage or N,N-disubstituted amide linkage or tertiary amine linkage. The closest prior (Olstein USPN 5,142,010) art discloses an infectious resistant polymer comprising a pendent biguanide group, however via a different linkage. The linkage is via a primary amine nitrogen atom and not a secondary nitrogen atom. Also the linkage is not a substituted thioruea linkage or tertiary amine linkage as required in the claim. Olstein discloses a phenylene linkage in order o attach the biguanide to a primary nitrogen atom. The linkage of the instant claims further comprises no hydrogen while hydrogen is required in the prior art. For these reasons the claims are novel and non-obvious over the prior art.

Art Unit: 1618

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
